

# Download Introduction To Wireless Systems 3rd Solution Manual

Consider a cellular system with an infinite number of channels. In such a system, all arriving calls begin receiving service immediately. The average call holding time is  $1/\mu$  when there are  $n$  calls in the system. Draw a state transition diagram for this system and develop expressions for the following: (a) Steady-state probability  $p_n$  of  $n$  calls in the system.
